

CARLTON WINE ROOM

This winelist is a 100 bottle offering that will be changing in some way, almost weekly.

In the warm months we'll have more white than reds, in the cold months, more reds than whites.

Everyday we'll open up a 'Staff Choice' bottle to serve by the glass, whilst these will not appear on the wine list, they will always be available.

Please ask if you're the curious type.

Wine Glass-

This is recommended for some sparkling wine. The winemakers of Champagne have been onto this little idea for years and we think they're onto something. We recommend you do what the winemakers do and try your sparkling wine from a wine glass rather than a flute.

Tree Hugger-

This person represents all of our wines that are either organic and or bio dynamic, as well as some producers that are practising these principles but are not formally certified. This does not mean the wines are necessarily any better, it's just a reference for those who care.

Orange-

This references our whites wines that look orange, or 'orange wines'. These are white grapes that are produced with some skin contact, some made quite similarly to red wines, some less so. These wines can be polarising and unusual, if you're unfamiliar, then we recommend seek help for your first try.
