

CARLTON WINE ROOM

Our winelist, of around 100 bottles - changes, in some way, almost weekly.

In the warm months we'll have more whites than reds, in the cold months, more reds than whites.

Every day we'll open up a 'Staff Choice' bottle to serve by the glass, whilst these will not appear on the wine list, they will always be available.

Please ask if you're the curious type.

RESERVE LIST

Our reserve list is simply formatted into what we see as the 3 most practical decisions you need to make before drinking great wine;

- Magnums
- Not Burgundy
- Burgundy

There is always a sommelier on duty to assist with any questions you may have.

Happy hunting, wine lovers.

Wine Glass-

This symbol is only for sparkling wine.

Winemakers have been using wine glasses rather than flutes for years.

The basic concept is the bigger glass allows you to see more of the wine open up. As a result of doing this you will sacrifice some fizz.

So in other words, less bubbles = more wine!

We recommend you do what the winemakers do.

Tree Hugger-

This person represents all of our wines that are either organic and or bio dynamic, as well as some producers that are practising these principles but are not formally certified. This does not mean the wines are necessarily any better, it's just a reference for those who care.

Orange-

This references our white wines that look orange, or 'orange wines' as they are commonly called. These are white grapes that are produced with some skin contact. These wines can be polarising and unusual, so if you're unfamiliar, we recommend you seek help for your first try.
